Step-by-Step Plan & Budget

A simple plan for when you feel confused: what to do first, who to call, how much to spend, and how to know when to grow.

Prepared 23 October 2026 for Lakshay, founder

New strategy: test small first · 5 steps · ₹48k pilot budget · 26 suppliers · daily task list

1 · NEW STRATEGY

Test small first, then grow

The team’s advice: don’t spend big on custom packaging or a big batch until real customers prove they like Broski. Run a **small pilot of about 100 kg (about 250 packs)**, learn fast, then grow.

~₹48k	100 kg	~250	15 Dec
pilot budget, everything included	biscuits in the pilot	packs of 400 g	decide whether to grow

What changed, and why

- **Packaging:** a custom printed pouch costs ~₹1 lakh for ~20,000 pouches. Too many and too risky now. Use **plain zip pouches (₹8) with our colourful stickers** instead. The sticker designs are already made.
- **Nothing is decided until samples arrive:** baker, flavours, pack size and price get decided by the council after quotes and dog taste tests.
- **Launch date:** rushing for Diwali (8 Nov) risks a bad product. Aim for a **soft launch in mid-November**, then the Christmas and New Year gifting season.
- **Budget:** from ~₹1.33 lakh down to ~₹48k for the pilot. The rest stays safe until the pilot proves itself.

The 5 steps at a glance

Step	When	Goal	Done when
1. Find the baker	23–30 Oct	Quotes and samples from 6+ bakers	3+ samples tasted by dogs
2. Decide	31 Oct–4 Nov	Council picks baker, 1–2 flavours, pouch, price	You say yes to the plan
3. Set up	23 Oct–10 Nov (in parallel)	Udyam, GST, trademark, Legal Metrology, lab test, stickers	Registrations filed; stickers printed
4. Make the pilot	7–14 Nov	Bake 100 kg, pack ~250 bags	Packs ready with labels and batch dates
5. Sell and learn	15 Nov–15 Dec	15 shops, 2 society stalls, WhatsApp group	150+ packs sold; reorders measured
Grow (if it works)	From 15 Dec	Bigger batch + digitally printed pouches	Council review

2 · STEP BY STEP

Exactly what to do

STEP 1: Find the baker (23–30 Oct)

1. Call or WhatsApp the 10 bakers in section 3. Ask the **7 questions**: flavours, can you add real peanut butter or chicken, rate per kg with and without GST, sugar in the recipe, shelf life, minimum order, will you pack 400 g bags, GST number.
2. Ask for a **paid sample (2–5 kg)** from the best 3–4. Budget ₹2,500.
3. Visit the top 2 units. Check the oven, cleanliness and storage, and confirm they bake it themselves.
4. **Dog taste test:** 5 dogs per sample. Note how fast they eat, the hardness and the smell. Put a sample in a jar and check it after 10 days for softness or mould.

STEP 2: Decide (31 Oct–4 Nov)

1. Send Rex the answers, photos and taste-test notes. The team makes a **scorecard** covering price, taste, quality, reliability and flavours.
2. The **council meets** and recommends: baker, 1–2 flavours, pack size (400 g or a 200 g trial), MRP and shop price.
3. You decide. Get the **baker's written rate, ingredient list and signed formula**.

STEP 3: Set up (start now, in parallel)

1. **Udyam:** free, 10 minutes, udyamregistration.gov.in.
2. **Business address**, then **GST** at gst.gov.in (3–7 working days).
3. **Trademark BROSKI**, class 31: ₹4,500.
4. **Legal Metrology packer registration** (₹500, Delhi Weights & Measures). Needed if you pack yourself.
5. **Lab test** of the chosen biscuit: moisture, mould and kcal, ₹3–8k.
6. Buy **pouches, a sealer, a stamped scale and a date stamp**. Rex finalises the stickers with real details. Print 270 front and 270 back.

STEP 4: Make the pilot (7–14 Nov)

- Order **100 kg**. Pack 400 g per bag, seal, stamp the batch and date, and stick the labels.
- Keep 5 kg for free samples and 1 sealed pack from the batch as a reference sample.

STEP 5: Sell and learn (15 Nov–15 Dec)

- 15 pet shops and groomers with a free-sample jar. 2 society stalls (with RWA permission). WhatsApp "Broski Pack" group.
- Track every sale. Every Monday, Rex reports packs sold, shops reordering and customer feedback.

3 · WHO TO CALL

Red flags in a baker: no GST bill or cash only · won’t share the ingredient list · won’t allow a visit · turns out to be a trader · makes chocolate or xylitol products on the same trays · can’t give batch or expiry dates · wants 100% advance without a sample.

If a human-biscuit bakery bakes for us, the recipe must have: no xylitol or sweeteners, no chocolate or cocoa, no raisins or grapes, no onion or garlic, no added salt or sugar, and clean trays. Keep it simple: atta or oats, egg or plain peanut butter, pumpkin or banana, a little oil.

3 · WHO TO CALL

Date / batch stamp	Self-inking dater	Any stationer	≈₹260–300	—

Foil or laminated pouches seal better with a **direct-heat** sealer. Test-seal your pouch in the shop before buying.

4 · BUDGET

Pilot budget: about ₹48,000

For 100 kg of biscuits, about 250 packs. Prices include GST where we know it. Anything over ₹5,000 waits for your yes.

Item	Calculation	Amount
Biscuit samples from 3–4 bakers	2–5 kg each	₹2,500
Biscuits for the pilot	100 kg × ~₹76	₹7,600
Plain zip pouches	270 × ₹8 + GST	₹2,550
Stickers, front and back	540 labels (local digital press)	₹3,500
Hand sealer	Direct-heat 12"	₹3,000
Stamped digital scale	10 kg × 1 g	₹2,700
Date/batch stamp + ink		₹400
Lab test	Moisture, mould, kcal	₹5,000
Trademark BROSKI	Class 31, individual/startup fee	₹4,500
Legal Metrology registration	Delhi	₹500
GST help (optional)	CA one-time	₹2,000
Sample jars + shelf cards	15 shops	₹2,700
Society stall (2)	Table, banner, prizes	₹2,500
Travel, deliveries		₹3,000
Contingency (10%)		₹5,000
Total pilot budget		**₹47,450**

Plastic EPR registration (brand owner, CPCB) is needed as we grow. Budget about ₹5–10k in December. Udyam and GST government fees are nil.

What the pilot can earn (if the working price is used: MRP ₹149, shop price ₹100)

If we sell	Revenue (approx.)	Covers
150 packs (60%)	≈₹16–18k	Biscuits + pouches + stickers, with learning
250 packs (100%)	≈₹27–30k	All stock costs + part of setup
Scale batch (1,000 packs/month)	≈₹37k profit/month at ~₹37/pack	Setup recovered in month 1–2

The pilot isn’t meant to make a big profit. Its job is to prove dogs love it and shops reorder, so the bigger money is spent safely.

5 · WHEN TO GROW

Pass or fix by 15 December

Measure	Pass: grow	Fix: change before growing
Packs sold of ~250	150+	Under 100
Shops reordering within 3 weeks	30%+ (5 of 15)	Under 3 shops
Direct buyers buying again within 30 days	20%+	Under 10%
Dogs refusing / complaints	Under 5%	Over 10%: change the recipe
Cost per pack (real)	Within plan	Over plan: renegotiate

If it passes: order 300 kg, switch to digitally printed pouches (₹23–28, from 500 pieces), add a second flavour, and approach quick commerce after barcodes and 6-month shelf life are proven.

Script to copy (WhatsApp / call): “Namaste ji, main Lakshay, Broski ka founder hoon, West Delhi mein naya dog biscuit brand. Pehle 50–100 kg ka trial chahiye, phir har mahine. Kripya bataiye: kaun se flavours banate hain, rate per kg (GST alag), minimum order, kya 400 g pouch mein pack kar sakte hain, shelf life, aur sample kab mil sakta hai? Aapka GST number bhi bhej dijiye. Dhanyavaad!”
